**FREE VACCINES  
FOR LIFE  
PROGRAM**

**COMPASSIONATE CARE  
VETERINARY HOSPITAL OF  
CHARLOTTE**

*A program to help our clients  
keep their pets happy and  
healthy for a lifetime!*

## What is it?

Free Vaccines for Life (FV4L) is a program offered exclusively by Compassionate Care Veterinary Hospital in **which your pet gets his/her core vaccines at no charge and other recommended vaccines at a deep discount.** Once enrolled, FV4L lasts your for pet's lifetime, as long as they get their Annual Wellness Care visit at Compassionate Care Veterinary Hospital.

### How Much Can I Save?

**Under most circumstances, your enrollment in the FV4L program will pay for itself within two visits!** The enrollment fee of \$125 covers canine and feline rabies, distemper combinations and individual leptospirosis vaccines, at **no charge.** Canine Bordetella (kennel cough), influenza, Lyme, and feline Leukemia vaccines are 50% off of our regular price for enrolled patients.

**That's a potential savings of MORE THAN \$ per year!**

## What's the catch?

There is none! We want to ensure our clients can plan for and afford all aspects of their pets' wellness, so we're removing the stress and uncertainty of vaccine costs. **Regular Wellness Care visits, annual dental cleanings, and routine laboratory testing is key to early disease detection and we want to ensure that level of care is accessible to our Compassionate Care family.**

In order to stay enrolled in the FV4L program, your pet must be seen at CCVH for an annual Wellness Care Visit within 13 months of his/her last one. If more than 13 months have passed since the last Wellness Care Visit, you are no longer enrolled and vaccines will be charged at full price unless you choose to re-enroll your pet(s) by paying the enrollment fee again. The fee is subject to change and we cannot guarantee that we will offer the program in the future.

The enrollment fee is non-refundable and non-transferable. Meaning if your pet is lost or passes away, it cannot be transferred to a new pet. Likewise, if you re-home your pet, it is not transferable to the new owner.

## Are there other benefits to enrolling in FV4L Program?

**Yes!** We offer **10% off your pet's spay or neuter and dental cleaning** along with 50% off any additional vaccines of Canine Bordetella (kennel cough), influenza, Lyme, and feline Leukemia.

## Why doesn't the FV4L Program include non core vaccines?

Canine kennel cough and influenza and feline leukemia exposure is dependent substantially on lifestyle. Owners with low risk pets may elect not to have their pet(s) vaccinated for these diseases.

## How do I get started?

**Contact the office today and our team can help you through the quick and simple enrollment process.**
